

## To Save as iWork '08

To have students save to the Pick up folder in Pages '08 format:

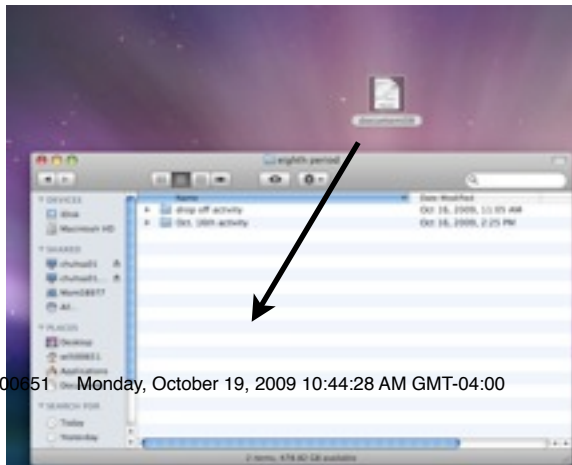

Click on File - Save As and have the students save the file where they normally save files

Give the document the name you want with an 08 after it (this is just a suggestion to help students with management of files)

Click on File - Save As again. This time when the save as Window shows up, check the box that says "Save Copy As" and select iWork '08 from the drop down menu.

Drag the document from the desktop into the proper teacher's Drop Off folder.
